iOS Technical Assignment

Overview

For this challenge, you will make a simple iOS app that shows a list of used car listings. Please commit all code to a public git repo. It helps if your commit messages are nice. Your commit history will help us see what you've done. When done, please send us a link to your repository.

The Challenge

Display a list of vehicles with the following information:

- Vehicle photo
- Year, make, model, trim
- Price
- Mileage
- Location
- Call dealer button

Tapping “Call dealer button” should initiate a phone call towards the dealer.

2014 Acura ILX
\$28,495 | 100k Mi | Fredricksburg, VA

[\(987\) 654-3210](#)

2015 Land Rover Range Rover
\$28,495 | 100k Mi | Fredricksburg, VA

[\(987\) 654-3210](#)

The screenshot above is just an example of what your app could look like.

API

In order to get the list of vehicles perform a GET request at:
<https://carfax-for-consumers.firebaseio.com/assignment.json>

Extras

If you have time and motivation, make the app look or behave better.
